1. Disconnect and Power Off your Existing Router (if you have one)
2. Power Off your Modem
3. Connect the High-Power Router to your Modem
4. Power On your Modem
5. Connect the High-Power Router to your Computer
6. Open your Web Browser
7. Welcome to the Smart Setup Wizard
8. Configure your Internet Connection
9. Set the System Clock
10. Configure your Wireless Settings
11. Wireless Security Settings
12. Setup Summary

The Smart Setup Wizard will guide you through the following settings:
- Internet Connection Settings
- System Clock
- Wireless Settings

Click Start to begin.

Configure your Internet Connection
- Configure your Internet settings using the automatic settings.
- More advanced users may choose to configure their connection manually by selecting Manual Configuration.
- If your Internet provider requires that you login before accessing the Internet, you will need to do so under Manual Configuration.
- If the Automatic Configuration was successful, you will be directed to a Configuration Successful page.
- Click Next to continue.

Configure your Wireless Settings
- The default SSID of your wireless network is Amped_Network.
- To change it, enter a new name in the SSID field. Users connecting wirelessly to the Router will use this ID to identify your wireless network.
- Click Next to continue.

Set the System Clock
- The System Clock is used for system logs and setting schedules for Internet access.
- Click Sync to synchronize the System Clock with the time on your computer.
- Click Next to continue.

If there was a problem with the Automatic Configuration, the wizard will notify you of the issue. If you continue to have problems, contact our support department at 888-573-8820.

If you experience any problems at any point during the Setup Wizard process, please contact Amped Wireless Technical Support. We're here to help:
- Phone: 888-573-8820
- Email: techsupport@ampedwireless.com
- Web: www.ampedwireless.com/support

Congratulations, the High Power Router is now successfully configured. Your settings are now saved. You may now connect additional devices directly to the 4 wired ports on the back panel, or connect wirelessly to the High Power Router.

Do NOT power on your Modem until Step 4.

Open your Web Browser
- If the URL fails to open, then try: http://192.168.3.1
- Enter the setup web address into your browser:
  - http://setup.ampedwireless.com
  - LOGIN: admin
  - PASSWORD: admin

Do NOT connect the power adapter to the High Power Router at this time.

Plug in the power adapter and reinsert the backup battery (if available) to power on the Modem.
- Allow a minute or two for the Modem to initiate.

Attach the two included Antennas.
Connect the included grey Ethernet cable to an available network port on your computer.
Attach the Power Adapter to the High Power Router and a power outlet.

High Power Wireless-N 600mW Smart Router

Welcome to the Smart Setup Wizard

Disconnect your existing router from your computer, your broadband modem and its power outlet. If you do not have an existing router please continue to Step 2.

Power off the Modem by disconnecting the Modem's power adapter from the power outlet. If your Modem has a backup battery, remove the backup battery from your Modem.

Check to see that your computer is NOT connected to any wireless networks.

NOTE: IF YOU HAVE PROBLEMS ACCESSING THE WEB MENU...
 Disable any third party firewalls that your computer may have on (i.e. Norton/Symantec/Windows).

Hold down the Reset Button for five to ten (5-10) seconds. You may need to use a pen tip or a small pin to press the button. There are two options to reset the High Power Router back to factory default settings:

1. Access the physical Reset Button on the back panel of the High Power Router:
   - Hold down the Reset Button on the High Power Router (back panel) for 3 seconds. As it blinks, push the WPS button on your wireless adapter or enable WPS with the provided software for your wireless adapter. WPS will automatically configure the connection settings for your wireless adapter to connect to the High Power Router.
   - You may need to use a pen tip or a small pin to press the button.

2. Use the default login and password (login: admin, password: admin) to access the web menu. View the More Settings > Management > Password. It is strongly recommended that you change your login and password for security.

If your Wi-Fi device has WPS one-touch setup you can use it to connect to the High Power Router:
- A. Tap the “Home” button to get to the home page.
- B. Touch the “On/Off” selector switch to “On” for your wireless adapter to connect to the High Power Router.
- C. Check that your computer’s network adapter is enabled and is set to “Obtain IP Address Automatically” through the web menu under Smart Features, Firewall Settings and Quality of Service on the left side of the web menu.
- D. Tap the Wi-Fi box to turn on Wi-Fi and scan.
- E. Under “Wi-Fi Networks” select: “Amped_Network” security key “wireless” and click OK.
- F. Under “Choose a Network” select: “Amped_Network” security key “wireless” and click OK.
- G. Make sure your computer is connected to the High Power Router using the included Ethernet cable.
- H. Open your web browser and enter 192.168.3.1 into the web address bar.
- I. If your Wi-Fi device has WPS one-touch setup you can use it to connect to the High Power Router.
