Power Off your Modem

Do NOT power on your modem until Step 4.

Step 1: Power On your Modem

Congratulations, the Router is now successfully configured and your settings are now saved. You may now connect additional devices directly to the Router's Modem port.

The Wizard will try to detect your Internet settings before accessing the Internet, a prompt will appear on the screen notifying you of the issue.

If there is a problem with your Internet connection or if your Internet provider requires that you log in or if your Internet provider requires that you log in before accessing the Internet, a prompt will appear on the screen notifying you of the issue.

Web: www.amedwireless.com/support

Email: techsupport@amedwireless.com

Phone: 888-573-8820 or 909-217-3168

If the URL fails to open, then try: http://192.168.3.1

If you wish to manually configure your Router you can now connect to the Router at this time if an update is available.

The Wizard will notify you if there is a newer firmware version available for your Router. We recommend that you upgrade to a newer firmware version if one is available.

4 wired ports on the back panel or connect wirelessly to the Router.

If your Wizard has configured your Internet settings you should see a green check mark.

Congratulations, the Router is now successfully configured and the Wizard has configured your Internet settings.

Congratulations, the Router is now successfully configured. If the Dashboard loads, scroll to the bottom and click the Setup Wizard button to access the wizard.

Once your Wizard has configured your Internet settings you may now connect additional devices directly to the Router's Modem port.

If the Dashboard loads, scroll to the bottom and click the Setup Wizard button to access the wizard.

The Dashboard is the home screen interface that allows you to control your Wi-Fi settings.

The wizard will now see the Dashboard when you access the Router's Modem port.

Congratulations, the Router is now successfully configured. If the Dashboard loads, scroll to the bottom and click the Setup Wizard button to access the wizard.

If you have a newly configured Internet setting, you may now connect additional devices directly to the Router's Modem port.

Once you have completed the Setup Wizard, you will now see the Dashboard enter your browser:

http://setup.amedwireless.com

GOT QUESTIONS?

Click Apply to save your settings. The Router will reboot. This process may take up to 1 minute. The Wizard will try to detect your Internet settings before accessing the Internet, a prompt will appear on the screen notifying you of the issue.

The Wizard will try to detect your Internet settings before accessing the Internet, a prompt will appear on the screen notifying you of the issue.

Open the setup web address into your browser:

Front Panel Tools: Status | Logs | Setup Wizard | Dashboard | Reset to Factory Settings | Upgrade Firmware

Welcome to the Setup Wizard

If it is your first time setting up the Router, the wizard will walk you through the setup process.

Step 2: Connect the Router to your Modem

If this is your first time setting up the Router, the wizard will try to detect your Internet settings.
