— READ FIRST —

**High Power Compact Wi-Fi Range Extender**   **REC10**

1 — Find an optimal setup location between your wireless router and your wireless dead zone

RECOMMENDED SIGNAL STRENGTH >70%

Wireless Router

Internet

Home/Office Network

Dead Zone

IMPORTANT: RECOMMENDED SIGNAL STRENGTH >70% **PLACE THE RANGE EXTENDER** IN A LOCATION WHERE IT CAN RECEIVE A STRONG SIGNAL FROM YOUR WIRELESS ROUTER

This can be done before or after setup is complete. The Range Extender will save your settings.

## 2 — Connect your PC or Tablet to the Range Extender

Available

a Attach the included antenna.

b Plug the Range Extender into a power outlet.

c Connect to the Range Extender's Wi-Fi network: Amped_REC10

Attention Windows Users:
A prompt may appear asking: "Do you want to set up your network?" If so, select "Connect to the network without setting it up" or "No, just connect".

— or —
3 — Open your web browser
Enter the setup web address into your browser:

http://setup.ampedwireless.com

If the URL fails to open, then try: http://192.168.1.240

Recommended browsers: Google Chrome, Safari or Internet Explorer (8.0 and up). Do not use Firefox.
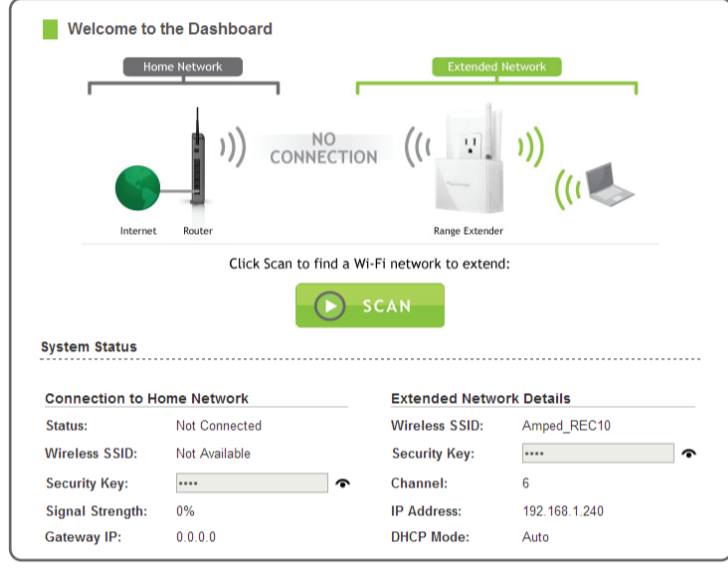

ACCESSING THE WEB MENU DOES NOT REQUIRE INTERNET ACCESS. THE MENU IS SERVED FROM THE RANGE EXTENDER.

IF YOU HAVE PROBLEMS ACCESSING THE WEB MENU...

a Disconnect your PC from all Wi-Fi networks.

b Attach an Ethernet cable (not included) between the PC and the Range Extender.
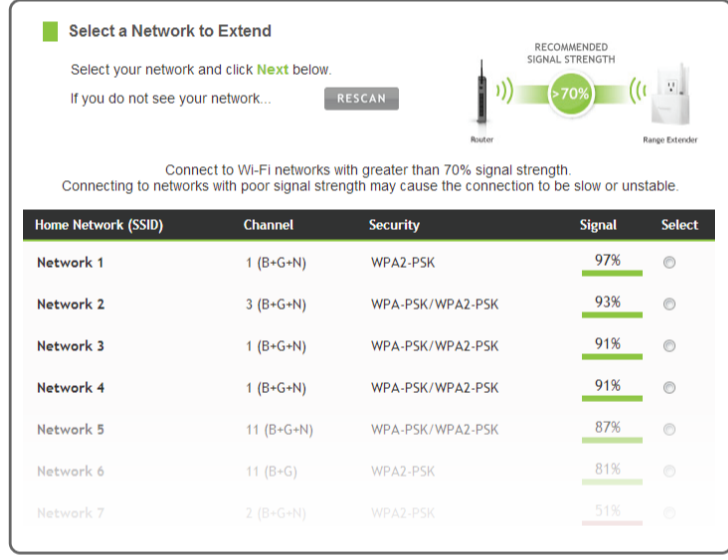

c Open your web browser and go to http://setup.ampedwireless.com again.

4 — Welcome to the Dashboard

Welcome to the Dashboard

Home Network — NO CONNECTION — Extended Network — Range Extender

Internet Router

Click Scan to find a Wi-Fi network to extend:

SCAN

System Status

Connection to Home Network		Extended Network Details	
Status:	Not Connected	Wireless SSID:	Amped_REC10
Wireless SSID:	Not Available	Security Key:	*****
Security Key:	*****	Channel:	6
Signal Strength:	0%	IP Address:	192.168.1.240
Gateway IP:	0.0.0.0	DHCP Mode:	Auto

The Dashboard will provide you with the current status of the Range Extender.

Click Scan to find available networks to extend.

5 — Scan for a Home Network to Extend

Select a Network to Extend

Select your network and click Next below.
If you do not see your network...

RESCAN

RECOMMENDED SIGNAL STRENGTH

Connect to Wi-Fi networks with greater than 70% signal strength.
Connecting to networks with poor signal strength may cause the connection to be slow or unstable.

Home Network (SSID)	Channel	Security	Signal	Select
Network 1	1 (B+G+N)	WPA2-PSK	97%	
Network 2	1 (B+G+N)	WPA-PSK/WPA2-PSK	93%	
Network 3	1 (B+G+N)	WPA-PSK/WPA2-PSK	91%	
Network 4	1 (B+G+N)	WPA-PSK/WPA2-PSK	91%	
Network 5	11 (B+G+N)	WPA2-PSK	57%	
Network 6	11 (B+G+N)	WPA2-PSK	41%	
Network 7	11 (B+G+N)	WPA2-PSK	38%	

Highlight and select the Wi-Fi network that you wish to extend.
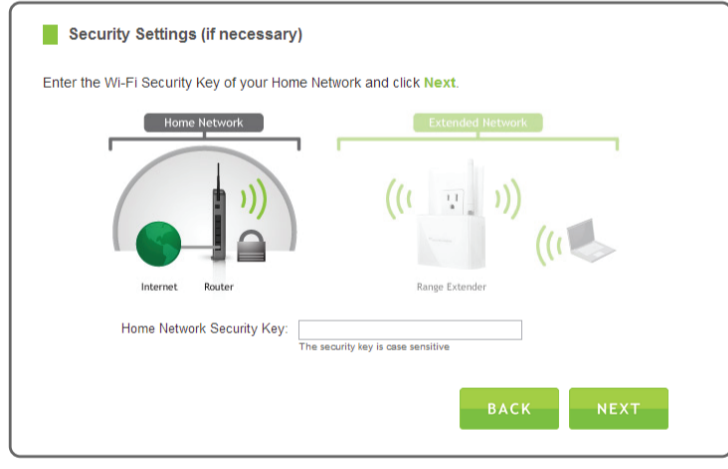

>70% Recommended Signal
Select the Wi-Fi network with a signal strength greater than **70%** for the most reliable connection.

Poor signal connections may cause slow speeds or dropped connections.

Click Next to continue.

If you do not see your desired wireless network, move the Range Extender closer to the router and scan again as it may be out of range.
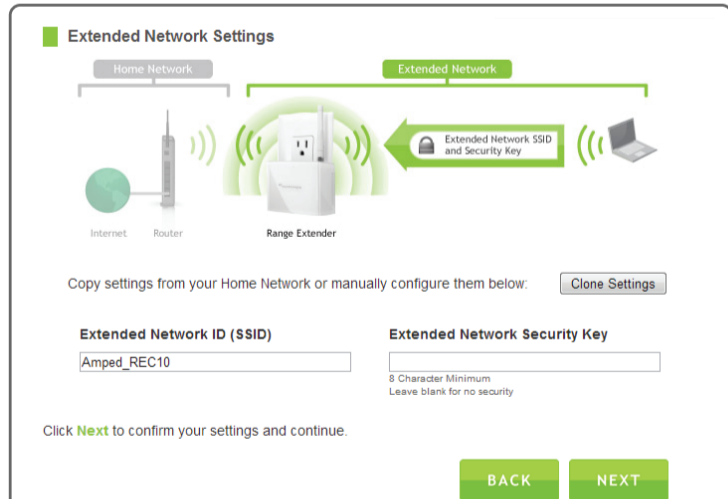

6 — Home Network Security Settings (if necessary)

Security Settings (if necessary)

Enter the Wi-Fi Security Key of your Home Network and click Next

Home Network — Extended Network — Range Extender

Internet Router

Home Network Security Key:

The security key is case sensitive.

BACK   NEXT

If your Home Network has security enabled, you will need to enter the key here.

Click Next to continue.

7 — Configure Settings for your Extended Network

Extended Network Settings

Home Network — Extended Network SSID and Security Key

Internet Router Range Extender

Copy settings from your Home Network or manually configure them below: Clone Settings

Extended Network ID (SSID)	Extended Network Security Key
Amped_REC10	

5 Character Minimum
63 Character Maximum
Leave blank for no security

Click Next to confirm your settings and continue.

BACK   NEXT

Connection Check

The wizard is applying your settings and connecting to the Home Network.

The connection check will complete in **30 seconds.**

The ID of your Extended Network is: **Amped_REC10**

If you choose to "Clone" the settings from your Home Network, the wizard will copy the SSID and security key of your Home Network.
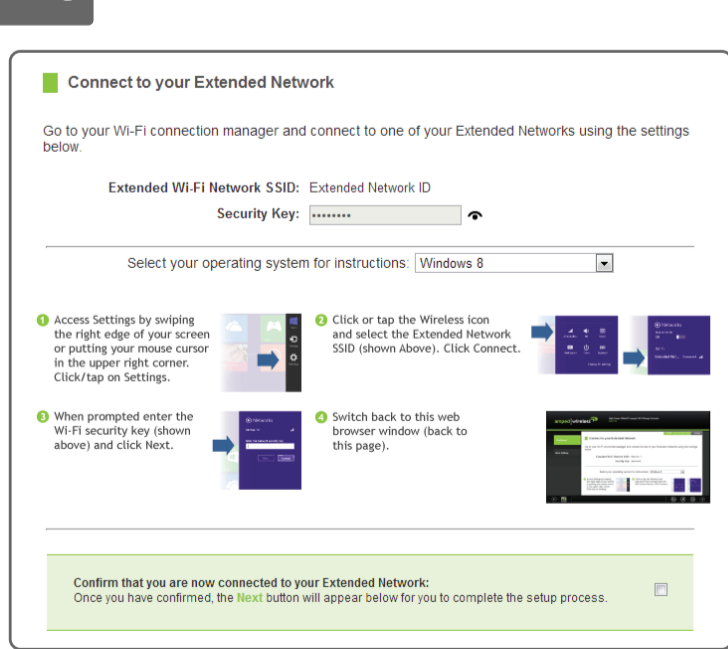

The SSID of the Extended Network will have a "_RE" at the end of its name. For example: Home_Network_RE

You can also manually enter a new network ID and security key. The new security key must be at least 8 characters long.

Click Next to apply the settings.

DO NOT LEAVE OR REFRESH THIS PAGE
Allow the countdown to complete and the wizard will automatically redirect you to the next step.

8 — Connect to the new Extended Network

Connect to your Extended Network

Go to your Wi-Fi connection manager and connect to one of your Extended Networks using the settings below.

Extended Wi-Fi Network SSID: Extended Network ID
Security Key: *******

Select your operating system for instructions: Windows 8

a Access Settings by swiping the right edge of your screen or putting your mouse cursor to the upper right corner. Click/tap on Settings.

b Click or tap the Wireless icon and select the Extended Network SSID (shown above). Click Connect.

c When prompted enter the Wi-Fi security key (shown above) and click Next.

d Switch back to this web browser window (back to this page).

Confirm that you are now connected to your Extended Network:
Once you have confirmed, the Next button will appear below for you to complete the setup process.
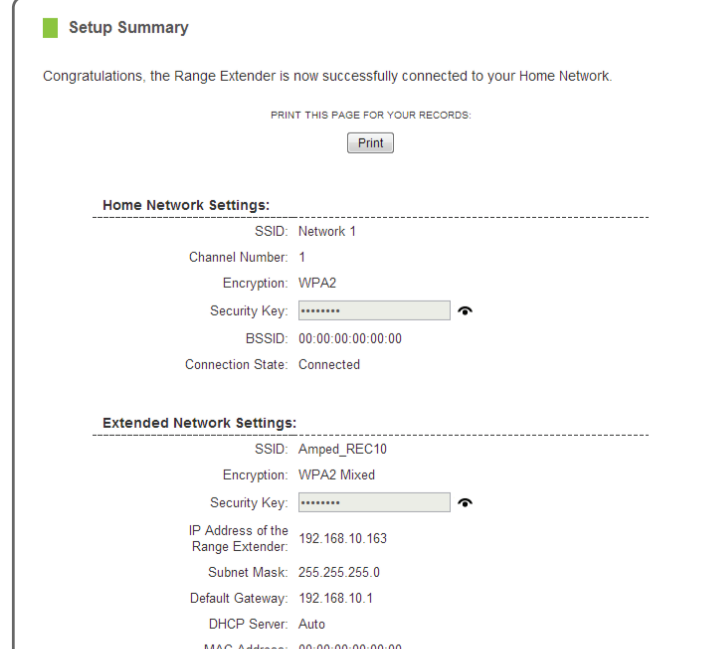

During the countdown process, the Range Extender will reboot and disconnect the Wi-Fi connection. At this point, you will need to reconnect your PC or tablet to the new Extended Network. Follow the instructions on the screen to connect to the Extended Network.

Once you have connected, click the check box to confirm. The Next button will appear allowing you to complete the setup process.

If there are problems with your configuration, the setup wizard will inform you to rescan for a network to extend.

If there are no problems, you will see the Setup Summary page below.

9 — Setup Summary

Setup Summary

Congratulations. Your Range Extender is now successfully connected to your Home Network.

PRINT THIS PAGE FOR YOUR RECORDS

Print

Home Network Settings:
SSID: Network 1
Channel Number: 1
Encryption: WPA2
Security Key: **********
BSSID: 00:00:00:00:00:00
Connection State: Connected

Extended Network Settings:
SSID: Amped_REC10
Encryption: WPA2 Mixed
Security Key: **********
IP Address of the Range Extender: 192.168.10.163
Subnet Mask: 255.255.255.0
Default Gateway: 192.168.10.1
DHCP Server: Auto
MAC Address: 00:00:00:00:00:00

Congratulations, the Range Extender is now successfully configured. Your settings are now saved.

If you haven't already positioned your Range Extender in an optimal location, you may do so now. All Range Extender settings are saved and can be safely powered off for relocation.

You may also attach any wired network devices to the wired port on the bottom of the Range Extender.

If you experience any problems during this process, please contact Amped Wireless Elite Support:

Phone: 888-573-8820
Email: techsupport@ampedwireless.com
Web: www.ampedwireless.com/support
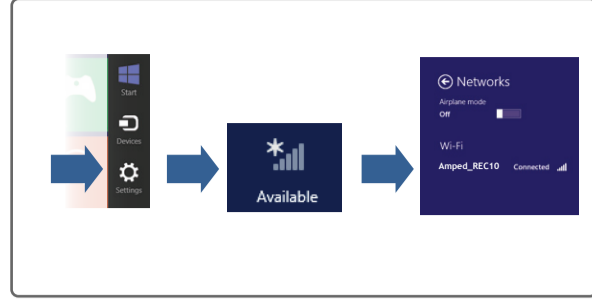

REC10

How to Connect to the Range Extender

Windows 7 and Vista

Click on the Wireless icon to see available wireless networks (For Vista, click Start > Connect To). Select the "Amped_REC10" network and click Connect.
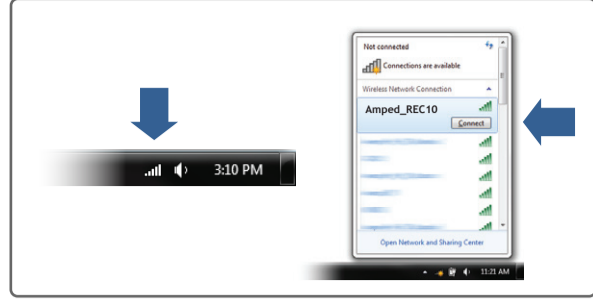

Windows 8

Swipe in from the right edge to access the charms bar, tap on Settings, select the Wi-Fi icon, and select "Amped_REC10".
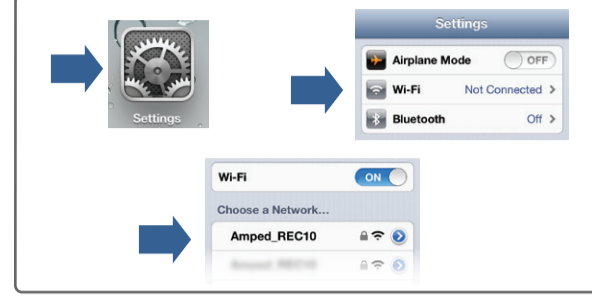

Mac OS X

Click on the Wireless icon to see available wireless networks. Select the "Amped_REC10" network and click Connect.

iPhone

Tap on your Settings icon, select Wi-Fi, and choose the network, "Amped_REC10".

iPad Tablet

A. Tap the "Home" button to get to the home page.
B. Tap the "Settings" app icon.
C. Tap on Wi-Fi to enter the iPad's Wi-Fi settings.
D. Toggle the Wi-Fi "On/Off" selector switch to "On"
E. Under "Choose a Network," select:
   "Amped_REC10"

Android Tablet

A. Tap the "Apps" menu on the tablet screen.
B. Locate and tap the "Settings" app icon.
C. Under "Wireless & networks," tap "Wi-Fi settings"
D. Tap the Wi-Fi box to turn on Wi-Fi and scan.
E. Under "Wi-Fi networks," select:
   "Amped_REC10"
Wi-Fi Protected Setup (One-Touch Setup or Push Button Configuration)

If your wireless adapter has WPS one-touch setup you can use it when connecting to the Range Extender. Hold down the WPS button on the Range Extender (bottom panel) for 3 seconds. The WPS LED will begin to blink. As it blinks, push the WPS button on your wireless adapter or enable WPS with the provided software for your wireless adapter.

Using the Smart Features on your Range Extender

The Range Extender is equipped with many powerful security features which can be accessed through the web menu under Smart Features on the left side of the web menu:

Wireless Access Scheduling
Control when your Wi-Fi is on/off
Menu Location: Smart Features > Access Schedule

User Access Control
Restrict network access to specific users
Menu Location: Smart Features > User Access

Wireless Coverage Control
Adjust the distance of your wireless network
Menu Location: Smart Features > Wireless Coverage

Web Menu (Left Side)

If you are unfamiliar or want more information on how to set up Smart Features, please refer to the User's Guide on the included CD.

Setting the Range Extender's System Clock

In order for your Access Schedules and logs to perform using the correct time stamps and schedules you will need to set your System Clock. To do so, go under Management and access the System Clock tab to sync the System Clock with your computer time.
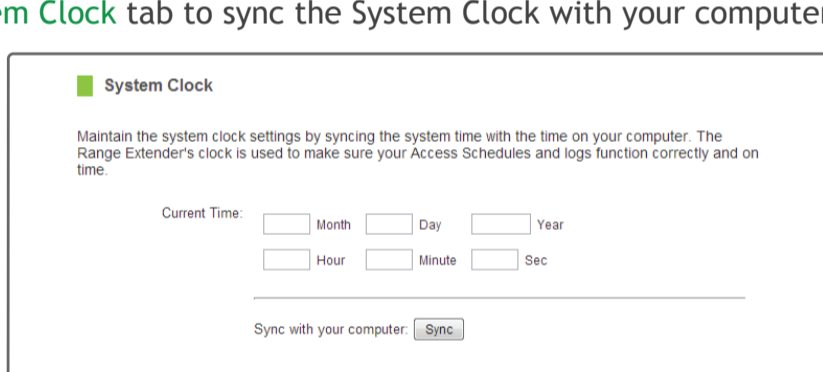

Setting a Login and Password for the Web Menu

This login/password is NOT the wireless network key used to connect to your wireless network.

For added security you may want to set a login and password to access the Web Menu. To do this go to More Settings > Management > Password on the left side of the web menu.
If you forget your login and password, you will need to reset the Range Extender back to default settings to access the web menu. To reset the Range Extender to default settings, hold the reset button on the bottom of the Range Extender for 5-10 seconds.

Tips: Power Outages, Rebooting Routers and Channel Changes

Wireless routers operate on specific wireless channels to avoid interference with neighboring networks. Some wireless routers are set to automatically scan for the best wireless channel. A power outage, or a simple reboot, may cause your home wireless router to change its wireless channel and cause the Range Extender to disconnect from your home network. **After a minute or two the Range Extender will automatically reconnect to your Home Network with the new settings.** However, if for whatever reason it does not, simply log onto the Range Extender's web menu by opening your web browser and accessing, http://setup.ampedwireless.com. If the page does not load, try resetting the Range Extender by holding down the reset button on the back panel for five to ten seconds. After the Range Extender has rebooted, open your web browser and try again.

When the web menu appears, run through the Wizard again to reconfigure the connection to your Home Network. To prevent the channel changing issue from occurring in the future, you may log onto your router's web menu and set the wireless channel from Automatic to a static channel number. You will need to reconfigure the Range Extender with the new channel. If you are not sure how to access your router's web menu, contact the support department for the brand of your wireless router.

Tips: Autoloading Web Menu

When the Range Extender loses its connection with your Home Network, the Web Menu will automatically load on your web browser. All web address entries will be redirected to the Wizard of the Range Extender. This feature is meant for you to easily reconfigure your Range Extender in the event of a disconnection. This feature may be disabled in the IP Settings menu of the web menu. The feature is titled: Auto-DNS.

Troubleshooting Tips

PROBLEM: I entered http://setup.ampedwireless.com and it failed to open the web menu.

SOLUTIONS: a. Make sure your computer is connected to the Range Extender's Wi-Fi network: Amped_REC10
              b. Try to use a different web browser. We recommend the Google Chrome web browser.
              c. Try to open your web browser to the default IP address by putting this number into your
                  web browser instead: 192.168.1.240
              d. Power off (unplug) the Range Extender and power it back on. Try again.
              e. Reset your Range Extender to default settings by holding the Reset Button (located on the back panel)
                  for ten (10) seconds and try again.
              f. If steps (a) through (e) fail, disconnect your PC from all Wi-Fi networks. Attach an Ethernet cable between
                  the Range Extender and your PC. Try to access http://setup.ampedwireless.com again.

PROBLEM: I cannot connect to my Home Network. I received an error when running the Wizard.

SOLUTIONS: a. Your Home Network may be secured. Double check that you have the correct security key to connect to
                  the Home Network.
              b. Try adjusting the channel number of your Home Network's router to channel 5 thru 11. Then attempt the
                  Wizard again.
              c. Reboot your Home Network router and try to connect again using the Wizard.
              d. Check to see that your Home Network router's DHCP server is enabled. The Range Extender needs to obtain
                  an IP from your Home Network router.

PROBLEM: My Range Extender was working fine previously, but now I can no longer access the Internet through the Range
            Extender.

SOLUTIONS: a. The connection to your Home Network may have been dropped or the router settings may have changed.
                  Changes to the router could be a result of several events, such as a power outage. When this occurs, connect
                  to the Range Extender and access the setup menu using the web address: http://setup.ampedwireless.com
                  Run the Wizard to reconnect the Range Extender to your network.
              b. Using the setup menu (setup.ampedwireless.com) check to see that the signal strength between the Range
                  Extender and your Home Network is above 70%. The Range Extender may be too far from your router and not
                  maintaining a signal strength of above 70%. Check the signal strength between the router and the Range
                  Extender through the web menu (left side): More Settings > Management > Device Status. The Signal Strength
                  readout will be under the Home Network Settings section. This Signal Strength must be above 70%.
                  If it is below, move the Range Extender closer to your router, or reposition the Range Extender.

PROBLEM: I cannot find my Home Network when scanning for wireless networks in the web menu Scan page.

SOLUTIONS: a. Your Home Network may be out of range. Move the Range Extender closer towards the wireless router and
                  try the Setup Wizard again from the web menu.
              b. Make sure that your Home Network's wireless SSID is broadcasting and not hidden. Hidden SSIDs will require
                  that you manually enter the SSID into the Wireless Settings > Home Network menu.
